

## AMENDMENTS TO THE CLAIMS

- Claim 1 (Currently amended): A liquid crystal display comprising a first panel positioned on a front surface of a backlight unit, and a second panel positioned on a back surface of the backlight unit; wherein the backlight unit provides light to both of the first panel and the second panel to enable either of the panels to display images, the backlight unit comprising:
- 10 a first light guide plate positioned on a back surface of the first panel;  
a second light guide plate positioned on a back surface of the second panel;  
at least a light source and a first lamp reflector  
15 surrounding the first light source positioned at a first side of the backlight unit, and at least a second light source and a second lamp reflector surrounding the second light source positioned at a second side of the backlight unit; and  
20 a reflector positioned between the first side and the second side to reflect light emitted from the first light source and the second light source to the first panel and the second panel.

25 Claim 2 (Canceled)

Claim 3 (Currently amended): The liquid crystal display of ~~claim 2~~ claim 1 wherein the first light source and the second light source comprise fluorescent lamps.

30

Claim 4 (Currently amended): The liquid crystal display of ~~claim 2~~ claim 1 wherein the first light source and

the second light source comprise light emitting diodes.

Claim 5 (Canceled)

5 Claim 6 (Currently amended): The liquid crystal display of ~~claim 2~~ claim 1 wherein the first light guide plate comprises patterns for destroying total reflection of light.

10 Claim 7 (Original): The liquid crystal display of claim 6 wherein the patterns comprise printing dots, non-printing dots and grooves.

15 Claim 8 (Currently amended): The liquid crystal display of ~~claim 2~~ claim 1 wherein the second light guide plate comprises patterns for destroying total reflection of light.

20 Claim 9 (Original): The liquid crystal display of claim 8 wherein the patterns comprise printing dots, non-printing dots and grooves.

25 Claim 10 (Original): The liquid crystal display of claim 1 wherein the first panel and the second panel display the same images.

30 Claim 11 (Original): The liquid crystal display of claim 1 wherein the first panel and the second panel display different images.

Claim 12 (Currently amended): ~~The liquid crystal display of claim 1 wherein the backlight unit comprises~~

A liquid crystal display comprising a first panel positioned on a front surface of a backlight unit, and a second panel positioned on a back surface of the backlight unit; wherein the backlight unit provides  
5 light to both of the first panel and the second panel to enable either of the panels to display images, the backlight unit comprising:

a first optical film and a first diffusion sheet positioned on a back surface of the first panel;

10 a second optical film and a second diffusion sheet positioned on a back surface of the second panel; and

at least a light source positioned between the first diffusion sheet and the second diffusion sheet, and light emitted from the light source passing through  
15 the first diffusion sheet and the second diffusion sheet to be uniformly transmitted to the first panel and the second panel.

Claim 13 (Original): The liquid crystal display of claim  
20 12 wherein the light source comprises a plurality of light emitting diodes positioned on a first surface of a printed circuit board to face the first panel, and a plurality of light emitting diodes positioned on a second surface of the printed circuit board to  
25 face the second panel.

Claim 14 (Original): The liquid crystal display of claim  
12 wherein the light source comprises a plurality of fluorescent lamps.

30

Claim 15 (Original): The liquid crystal display of claim  
12 wherein the first optical film and the second optical

film comprise at least a diffuser sheet and a prism  
sheet.
